Technology – How it works

markem·imaje

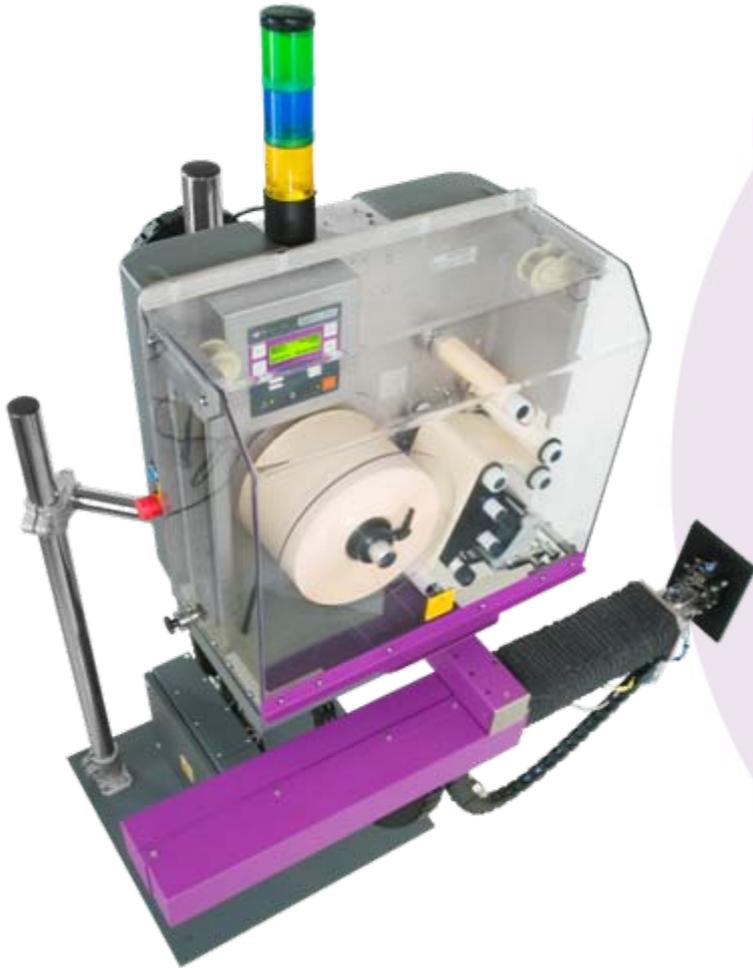

- Print and apply systems are used to identify cartons and pallets in increasingly automated environments. The system comprises of two main parts, a print engine and an applicator. Print and apply machines can be easily integrated onto any production line.
- The print engine, in stand alone mode with a PC or a terminal, or integrated into the production process, prints the messages onto the adhesive label.
- Once the label is printed, the applicator applies it to either a moving or stationery product. Many application methods are available dependant on the product and production process.

Technology – How it works

markem·imaje

- **Markem-Imaje advantages:** our Print & Apply systems are recognized for their high quality printing (100% readable and GS1 compliant barcodes), outstanding reliability and rugged durability in the toughest of manufacturing environments. Their design and variety of applicators offer a flexible, scalable solution for achieving the ultimate traceability.

Product in short - Introduction

markem·imaje

The largest range of print and apply systems

Case labeling

2000 Series

CimJet

2000 Series

Product in short – Performance Print and Apply systems

markem·imaje

- High quality print and apply on several sides of the outer case
- Up to 100 cases per minute
- Choice of high quality consumables

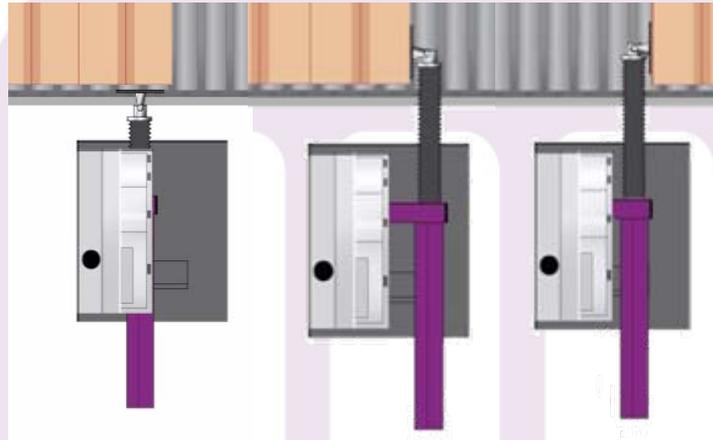

Product in short – Performance CimPak

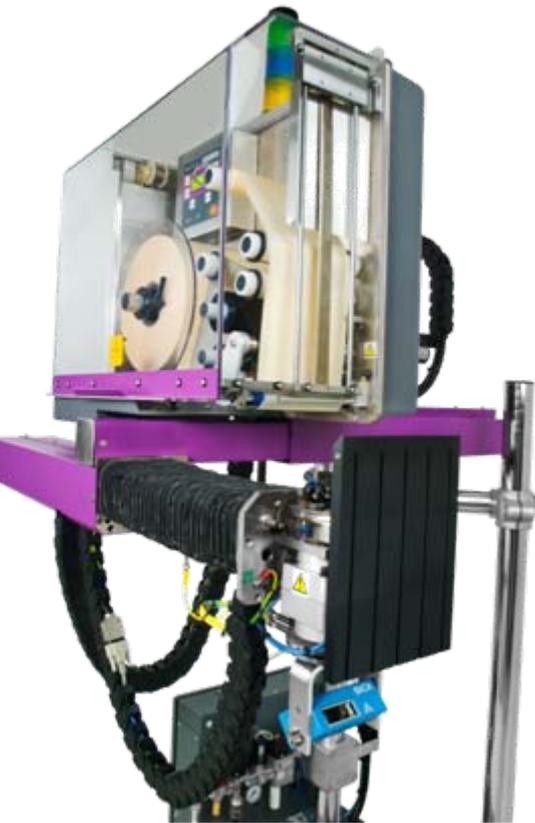

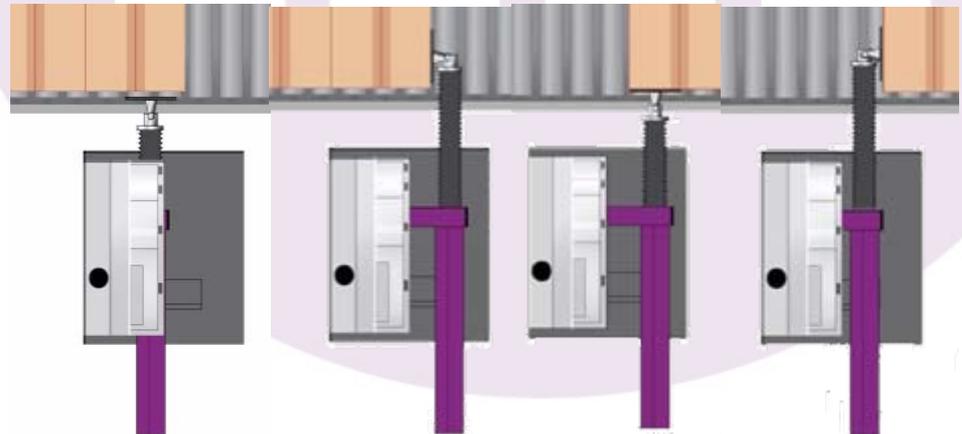

markem·imaje

- Labeling up to **3 sides** on a pallet

- Up to **4 labels** on **3 sides** of a pallet

Product in short – Modularity

2000 Series

markem·imaje

- One single print engine for both **direct thermal** or **thermal transfer**, 2", 4" and 6" print widths in 200 or 300 dpi resolutions
- Investment protection
- Interchangeable applicator modules

Product in short – Connectivity

Print and Apply systems

markem·imaje

- Easy network integration with a built-in high speed communication interface and web server

4 main products available

Click on the PDFs below to discover their specifications.

2000 Series

print and apply systems

Our technology

The 2000 Series is an award-winning industrial style, high speed, high quality printer that is the most flexible choice for a wide range of applications. It is the most reliable and most consistent choice for print and apply systems in the market.

Required a small footprint, maximum energy efficiency, the most powerful of available motor, the 2000 Series will ensure consistent high quality printing for 100,000+ hours of use.

Your benefits

Reliable - Built with a proven design for high speed and consistent performance. High quality print and apply systems for a wide range of applications.

Performance - Proven award-winning design and the most powerful of available motor, the 2000 Series will ensure consistent high quality printing for 100,000+ hours of use.

Cost saving - The most powerful of available motor, the 2000 Series will ensure consistent high quality printing for 100,000+ hours of use.

2000 Pallet

print and apply systems

Our technology

The 2000 Pallet is an award-winning industrial style, high speed, high quality printer that is the most flexible choice for a wide range of applications. It is the most reliable and most consistent choice for print and apply systems in the market.

Required a small footprint, maximum energy efficiency, the most powerful of available motor, the 2000 Pallet will ensure consistent high quality printing for 100,000+ hours of use.

Your benefits

Reliable - Built with a proven design for high speed and consistent performance. High quality print and apply systems for a wide range of applications.

Performance - Proven award-winning design and the most powerful of available motor, the 2000 Pallet will ensure consistent high quality printing for 100,000+ hours of use.

Cost saving - The most powerful of available motor, the 2000 Pallet will ensure consistent high quality printing for 100,000+ hours of use.

CimJet

print and apply systems

Our technology

The CimJet is an award-winning industrial style, high speed, high quality printer that is the most flexible choice for a wide range of applications. It is the most reliable and most consistent choice for print and apply systems in the market.

Required a small footprint, maximum energy efficiency, the most powerful of available motor, the CimJet will ensure consistent high quality printing for 100,000+ hours of use.

Your benefits

Reliable - Built with a proven design for high speed and consistent performance. High quality print and apply systems for a wide range of applications.

Performance - Proven award-winning design and the most powerful of available motor, the CimJet will ensure consistent high quality printing for 100,000+ hours of use.

Cost saving - The most powerful of available motor, the CimJet will ensure consistent high quality printing for 100,000+ hours of use.

CimPak

print and apply systems

Our technology

The CimPak is an award-winning industrial style, high speed, high quality printer that is the most flexible choice for a wide range of applications. It is the most reliable and most consistent choice for print and apply systems in the market.

Required a small footprint, maximum energy efficiency, the most powerful of available motor, the CimPak will ensure consistent high quality printing for 100,000+ hours of use.

Your benefits

Reliable - Built with a proven design for high speed and consistent performance. High quality print and apply systems for a wide range of applications.

Performance - Proven award-winning design and the most powerful of available motor, the CimPak will ensure consistent high quality printing for 100,000+ hours of use.

Cost saving - The most powerful of available motor, the CimPak will ensure consistent high quality printing for 100,000+ hours of use.

Software

markem·imaje

- Markem-Imaje software and networking solutions are part of the overall global marking and coding offering.
- They ensure **product data integrity** to deliver the right message on the right product and optimize marking activities.
- They help **secure data entry, reduce human intervention and offer a data production central management system** capable of meeting a wide diversity of applications and needs.
- Click on the PDF to know more about **pallet labeling solutions**
